

K.M. Salikhov

Comment on the spin-selective recombination term in the kinetic equation for the radical pair density matrix

Zavoisky Physical-Technical Institute, Federal Research Center "Kazan Scientific Center of Russian Academy of Sciences", Sibirsky Trakt Str, 10/7, Kazan 420029, Tatarstan Republik, Russian Federation

Annotation.

In the scientific literature, there are several proposals for taking into account the spin-dependent recombination of radical pairs in the equation of motion for their density matrix.

In my report, I plan to bring these proposals and express my point of view.
